

HUMPHREYS & PARTNERS ARCHITECTS, L.P.

MEET YOUR DALLAS STUDIO TEAM

Some of our best multifamily developments have been built in Dallas as well as around the country and designed by our main office team. Suzette Sutton, our Executive Business Developer, adds her thoughts below on some of our most successful projects completed over the last year.

HERMOSA VILLAGE Leander, TX
238-unit Big House®

"Hermosa Village is designed in a charming urban-farmhouse style located just outside of Austin. This Texas Hill Country community features outdoor amenities like a communal herb garden, orchard, and farm-to-table garden."

VITRUVIAN WEST Addison, TX
383-unit Wrap

"Vitruvian West is the first of three phases that will eventually join an 1,100-unit master-planned community. The design and planning objectives of this phase were to deliver the community's first apartment building."

CREEKSIDE PARK The Woodlands, TX
292-unit Big House® & e-Urban®

"We were thrilled to collaborate with Howard Hughes on their first multifamily development. This Craftsman-style community, located just outside of Houston, blends two of our best signature designs in one community."

LVL 29 Plano, TX
328-unit Home Rise®

"As the largest HUD deal in the Southeastern United States and the tallest multifamily building north of Dallas, LVL utilizes our signature Home Rise® design, which maximizes efficiency by eliminating long corridors and offering two small elevator lobbies on each floor."

RIDGELINE AT ROGERS RANCH San Antonio, TX
229-unit Big House® & e-Urban®

Located in one of San Antonio's most popular subdivisions, Ridgeline at Rogers Ranch offers the perfect hill country retreat from the city, while just minutes from major highways and features sought after amenities in a gated community."
